# Piotr Zytek

Front End Developer

Summary

I am a PLC and robotics programmer with experience in creating HMI visualizations. Currently, I am actively developing my skills as a self-taught front-end enthusiast, focusing on JavaScript/React technologies. I am seeking a position as a front-end developer to combine my current professional experience with the acquired skills and knowledge in designing responsive websites. I continuously strive to improve my abilities in crafting interactive interfaces and providing optimal solutions. My goal is to design aesthetically pleasing and intuitive applications that deliver exceptional user experiences. I am looking forward to further honing my skills in this rapidly evolving field of front-end development.

Work History

2023-01 - 2020-12

Automation Engineer

FSM Polska Sp. z o.o.

- Programming PLC controllers and industrial robots
- Creating visualizations for HMI operator panels
- Integration and configuration of information systems supervising the course of the technological process

Education

2019-07

Automation and Robotics, Master of Science

Wroclaw University of Technology

Specialization: Information Technologies in Electronics Systems

2018-02

Automation and Robotics, Engineer

Wroclaw University of Technology

Projects

https://github.com/pzytek

Certificates

Responsive Web Design

freeCodeCamp.com

JavaScript Algorithms and Data Structures

freeCodeCamp.com

Programming industrial ABB robots - basic

EMT-Systems Centrum Szkoleń Inżynierskich

Programming industrial ABB robots - advanced

EMT-Systems Centrum Szkoleń Inżynierskich
